Contents of Volume 107

Number 1, 7 March 1984

LAVETT, D. K., A Model for Transcriptional Regulation Based Upon Homology Between Introns and Promoter Regions and Secondary Structure in the Promoter Regions: The Human Globins 1

MCGAVIN, S., Construction and Use of Models Designed to Demonstrate some Topological Properties of Multistranded Nucleic Acid Structure and its Possible Bearing on Recombination . . 37

HOEKSTRA, R. F., JANZ, R. F. and SCHILSTRA, A. J., Evolution of Gamete Motility Differences I. Relation Between Swimming Speed and Pheromonal Attraction 57

HOEKSTRA, R. F., Evolution of Gamete Motility Differences II. Interaction with the Evolution of Anisogamy 71

LEPS, B., BARNICKEL, G. and BRADACZEK, H., Structural Studies on the Bacterial Cell Wall Peptidoglycan Pseudomurein I. Confirmational Energy Calculations on the Glycan Strands in C1 Conformation and Comparison with Murein 85

YODZIS, P., The Structure of Assembled Communities II . . 115

WHEATLEY, D. N., Intracellular Protein Degradation: Basis of a Self-Regulating Mechanism for the Proteolysis of Endogenous Proteins 127

BORNBUSCH, A. H., Turning Field Size and its Effects upon Computer-Simulated Klinotactic Orientation 151

LETTERS TO THE EDITOR

MCCABE, M., Should Reptation Theory for Migration of Linear DNA Through Gels Include Screwing? 165

CASWELL, H., Optimal Life Histories and Age-Specific Costs of Reproduction: Two Extensions 169

BRUGMAN, C. J. M., VAN DEN HOOFF, H. and BLANGÉ, T., Some Aspects of the Role of Quantum Mechanics in the Theory of Muscle Contraction 173

Number 2, 21 March 1984

KHOLODENKO, B. N., Control of Mitochondrial Oxidative Phosphorylation 179

CLAY, J. R. and SHLESINGER, M. F., Analysis of the Effects of Cesium Ions on Potassium Channel Currents in Biological Membranes . 189

HYVER, C., Local and Global Limit Cycles in Biochemical Systems 203

GIESSNER-PRETTRE, C., LANGLET, J. and CARON, F., Theoretical Study of the Geometrical Arrangement of GT and GA Wobble Pairs in Two Short Duplexes. Proton NMR Chemical Shifts and Interaction Energy Calculations 211

STERN, C. D., A Simple Model for Early Morphogenesis . . 229

MAROUDAS, N. G., Cell Membrane Entropy as Regulator of Receptor Submergence 243

KONDRASHOV, A. S., Rate of Evolution in a Changing Environment 249

GOODFELLOW, J. M., Solvent Interactions in Nucleic Acid Crystal Hydrates 261

STONE, M., Variance–Covariance Modelling with Chromosome Markers 275

RÉGNIÈRE, J., Vertical Transmission of Diseases and Population Dynamics of Insects with Discrete Generations: A Model . 287

MOROZ, P. E., The Cell in the Field of Gravity and the Centrifugal Field 303

RUBIN, C. T. and LANYON, L. E., Dynamic Strain Similarity in Vertebrates: an Alternative to Allometric Limb Bone Scaling . 321

STAMATO, F. M. L. G., LONGO, E., YOSHIOKA, L. M. and FERREIRA, R. C., The Catalytic Mechanism of Serine Proteases: Single Proton versus Double Proton Transfer 329

LETTERS TO THE EDITOR

CRISPE, I. N. and LATHANGUE, N. B., Cancer is not Due to the Expression of Introns 339

GRAHAM, J., Cancer and Evolution: Amplification . . 341

Number 3, 7 April 1984

PARNAS, H. and SEGEL, L. A., Exhaustion of Calcium does not Terminate Evoked Neurotransmitter Release 345

KITNEY, R. I., MIALL, R. C., STEIN, J. F. and RIDDELL, P. M., Time Series Analysis of Neuronal Signals Recorded in the Cerebellum of Trained Monkeys 367

LAMBERT, G. R., Enzymic Editing Mechanisms and the Origin of Biological Information Transfer 387

SPENCER, N., Amino Terminal Acetylation and Protein Synthesis in Eukaryotes 405

ROSIN, R., Further Analysis of the Honey Bee "Dance Language" Controversy. I. Presumed Proofs for the "Dance Language" Hypothesis by Soviet Scientists 417

NESTERENKO, V. G., A Concept of Immune Regulation of Somatic Cell Differentiation 443

LEONARD, J. L., A Top-down Approach to the Analysis of Behavioural Organization 457

FOULDS, L. R., Maximum Savings in the Steiner Problem in Phylogeny 471

BOOKSTEIN, F. L., A Statistical Method for Biological Shape Comparisons 475

Number 4, 21 April 1984

SAUD, I., KHAN, M. Z. and KHAN, A. A., Diversity of Order α . 521

JOHNSON, I. R. and THORNLEY, J. H. M., A Model of Instantaneous and Daily Canopy Photosynthesis 531

SUH, O. and WEISS, L., The Development of a Technique for the Morphometric Analysis of Invasion in Cancer . . . 547

O'GRADY, R. T., Evolutionary Theory and Teleology . . . 563

TAKENAKA, T. and GOTOH, H., Simulation of Axoplasmic Transport 579

COOPER, W. S., Expected Time to Extinction and the Concept of Fundamental Fitness 603

Lánský, P., On Approximations of Stein's Neuronal Model . 631

Matsumoto, G., A Proposed Membrane Model for Generation of Sodium Currents in Squid Giant Axons 649

Antonelli, P. L. and Kazarinoff, N. D., Starfish Predation of a Growing Coral Reef Community 667

Syvanen, M., Conserved Regions in Mammalian β-globins: Could They Arise by Cross-species Gene Exchange? 685

Letter to the Editor

Konopka, A., Is the Information Content of DNA Evolutionarily Significant? 697

Index to Volume 107

Acetylation, amino terminal, and protein synthesis in eukaryotes, 405
Age-specific costs of reproduction, optimal life histories and; two extensions (letter), 169
Allometric limb bone scaling, an alternative to; dynamic strain similarity in vertebrates, 321
α order, diversity of, 521
Amino terminal acetylation and protein synthesis in eukaryotes, 405
Anisogamy evolution, interaction with the evolution of gamete motility differences, 71
ANTONELLI, P. L. and KAZARINOFF, N. D., Starfish predation of a growing coral reef community, 667
Assembled communities, the structure of, 115
Axons, giant, squid, a membrane model for generation of sodium current in, 649
Axoplasmic transport, simulation of, 579

Bacterial cell wall peptidoglycan pseudomurein, structural studies on; conformational energy calculations on the glycan strands in C1 conformation and comparison with murein, 85
BARNICKEL, G. (see LEPS, B), 85
Behavioural organization, a top-down approach to the analysis of, 457
Biochemical systems, local and global limit cycles in, 203
BLANGÉ, T. (see BRUGMAN, C. J. M.), 173
Bone scaling, limb, allometric, an alternative to; dynamic strain similarity in vertebrates, 321
BOOKSTEIN, F. L., A statistical method for biological shape comparisons, 475
BORNBUSCH, A. H., Turning field size and its effects upon computer-simulated klinotactic orientation, 151
BRADACZEK, H. (see LEPS, B.), 85
BRUGMAN, C. J. M., VAN DEN HOOFF, T. and BLANGÉ, T., Some aspects of the role of quantum mechanics in the theory of muscle contraction (letter), 173

Calcium exhaustion does not terminate evoked neurotransmitter release, 345
Cancer, the development of a technique for the morphometric analysis of invasion in, 547
Cancer and evolution: amplification (letter), 341
Cancer is not due to the expression of introns (letter), 339
Canopy photosynthesis, instantaneous and daily, a model of, 531
CARON, F. (see GIESSNER-PRETTRE, C.), 211
CASWELL, H., Optimal life histories and age-specific costs of reproduction: two extensions (letter), 169
Catalytic mechanism of serine proteases: single proton versus double proton transfer, 329
Cell differentiation, somatic, a concept of immune regulation of, 443

Cell in the field of gravity and the centrifugal field, 303
Cell membrane entropy as regular of receptor submergence, 243
Cell wall peptidoglycan pseudomurein, bacterial, structural studies on; conformational calculations on the glycan strands in C1 conformation and comparison with murein, 85
Centrifugal field, the cell in the field of gravity and, 303
Cerebellum of trained monkeys, time series analysis of neuronal signals recorded in, 367
Cesium ions, their effects on potassium channel currents in biological membranes, 189
Chromosome markers, variance–covariance modelling with, 275
CLAY, J. R. and SHLESINGER, M. F., Analysis of the effects of cesium ions on potassium channel currents in biological membranes, 189
Communities, assembled, the structure of, 115
Community, coral reef, growing, starfish predation of, 667
Conformational energy calculations on the glycan strands in C1 conformation and comparison with murein; structural studies on the bacterial cell wall peptidoglycan pseudomurein, 85
Conserved regions in mammalian β-globins: could they arise by cross-species gene exchange?, 685
COOPER, W. S., Expected time to extinction and the concept of fundamental fitness, 603
Coral reef community, growing, starfish predation of, 667
Costs, age-specific, of reproduction, optimal life histories and; two extensions (letter), 169
Covariance–variance modelling with chromosome markers, 275
CRISPE, I. N. and LATHANGUE, N. B., Cancer is not due to the expression of introns (letter), 339
Cross-species gene exchange: could it give rise to conserved regions in mammalian β-globins?, 685
Crystal hydrates, nucleic acid, solvent interactions in, 261
Currents, potassium channel, in biological membranes, the effects of cesium ions on, 189
Currents, sodium, in squid giant axons, a membrane model for generation of, 649
Cycles, local and global limit, in biochemical systems, 203

"Dance language" of honey bees, presumed proofs for the hypothesis by Soviet scientists, 417
Differentiation, cell, somatic, a concept of immune regulation of, 443
Diseases, vertical transmissiom of, and population dynamics of insects with discrete generations; a model, 287
Diversity of order α, 521
DNA information content: is it evolutionarily significant? (letter), 697
DNA, linear, should reptation theory for migration through gels include screwing? (letter), 165
Duplexes, short, theoretical study of the geometrical arrangement of GT and GA wobble pairs in; proton NMR chemical shifts and interaction energy calculations, 211

Dynamics strain similarity in vertebrates: an alternative to allometric limb bone scaling, 321

Editing mechanisms, enzymic, and the origin of biological information transfer, 387
Enzymic editing mechanisms and the origin of biological information transfer, 387
Entropy, cell membrane, as regular of receptor submergence, 243
Environment, changing, rate of evolution in, 249
Eukaryotes, amino terminal acetylation and protein synthesis in, 405
Evolution and cancer: amplification (letter), 341
Evolution of gamete motility differences. Interaction with the evolution of anisogamy, 71
Evolution of gamete motility differences. Relation between swimming speed and pheromonal attraction, 57
Evolution rate in a changing environment, 249
Evolutionary significance of the information content of DNA (letter), 697
Evolutionary theory and teleology, 563
Extinction, expected time to, and the concept of fundamental fitness, 603

FERREIRA, R. C. (see STAMATO, F. M. L. G.), 329
Field of gravity and the centrifugal field, the cell in, 303
Fitness, fundamental, expected time to extinction and the concept of, 603
FOULDS, L. R., Maximum savings in the Steiner problem in phylogeny, 471

GA and GT wobble pairs in two short duplexes, theoretical study of the geometrical arrangement of; proton NMR chemical shifts and interaction energy calculations, 211
Gamete motility differences, evolution of; interaction with the evolution of anisogamy, 71
Gamete motility differences, evolution of; relation between swimming speed and pheromonal attraction, 57
Gels, should reptation theory for migration of linear DNA include screwing? (letter), 165
Gene cross-species exchange: could it give rise to conserved regions in mammalian β-globins?, 685
Giant axons, squid, a membrane model for generation of sodium currents in, 649
GIESSNER-PRETTRE, C., LANGLET, J. and CARON, F., Theoretical study of the geometrical arrangement of GT and GA wobble pairs in two short duplexes. Proton NMR chemical shifts and interaction energy calculations, 211
Globins, human: a model for transcriptional regulation based upon homology between introns and promoter regions and secondary structure in the promoter regions, 1
β-globins, mammalian, conserved regions in; could they arise by cross-species gene exchange?, 685
GOODFELLOW, J. M., Solvent interactions in nucleic acid crystal hydrates, 261
GOTOH, H. (see TAKENAKA, T.), 579
GRAHAM, J., Cancer and evolution: amplification (letter), 341
Gravitational field and centrifugal field, the cell in, 303
Growing coral reef community, starfish predation of, 667

HOEKSTRA, R. F., Evolution of gamete motility differences II. Interaction with the evolution of anisogamy, 71
HOEKSTRA, R. F., JANZ, R. F. & SCHILSTRA, A. J., Evolution of gamete motility differences I. Relation between swimming speed and pheromonal attraction, 57
Honey bee "dance language" controversy; presumed proofs for the "dance language" hypothesis by Soviet scientists, 417
Human globins: a model for transcriptional regulation based upon homology between introns and promoter regions and secondary structure in the promoter regions, 1
Hydrates, nucleic acid crystal, solvent interactions in, 261
HYVER, C., Local and global limit cycles in biochemical systems, 203

Immune regulation of somatic cell differentiation, a concept of, 443
Information content of DNA: is it evolutionarily significant? (letter), 697
Information transfer, biological, enzymic editing mechanisms and the origin of, 387
Insects with discrete generations, vertical transmission of diseases and population dynamics of; a model, 287
Intracellular protein degradation: basis of a self-regulating mechanism for the proteolysis of endogenous proteins, 127
Introns, cancer is not due to the expression of (letter), 339
Introns and promoter regions and secondary structure in the promoter regions, a model for transcriptional regulation based upon homology between; the human globins, 1

JANZ, R. F. (see HOEKSTRA, R. F.), 57

Membrane entropy, cell, as regular of receptor submergence, 243
Membrane model for generation of sodium currents in squid giant axons, 649
Membranes, biological, the effects of cesium ions on potassium channel currents in, 189
MIALL, R. C. (see KITNEY, R. I.), 367
Migration of linear DNA through gels, should reptation theory include screwing? (letter), 165
Mitochondrial oxidative phosphorylation, control of, 179
Monkeys, time series analysis of neuronal signals recorded in the cerebellum of, 367
MOROZ, P. E., The cell in the field of gravity and the centrifugal field, 303
Morphogenesis, early, a simple model for, 229
Morphometric analysis of invasion in cancer, the development of a technique for, 547
Motility differences for gametes, evolution of; interaction with the evolution of anisogamy, 71
Motility differences for gametes, evolution of; relation between swimming speed and pheromonal attraction, 57
Murein, conformational energy calculations on the glycan strands in C1 conformation and comparison with; structural studies on the bacterial cell wall peptidoglycan pseudomurein, 85
Muscle contraction, the role of quantum mechanics in the theory of (letter), 173

NESTERENKO, V. G., A concept of immune regulation of somatic cell differentiation, 443
Neuronal model, Stein's, on approximations of, 631
Neuronal signals recorded in the cerebellum of trained monkeys, time series analysis of, 367
Neurotransmitter release, evoked, is not terminated by exhaustion of calcium, 345
Nucleic acid crystal hydrates, solvent interactions in, 261

Nucleic acid structure, multistranded, and its possible bearing on recombination, construction and use of models to demonstrate some topological properties of, 37

O'GRADY, R. T., Evolutionary theory and teleology, 563
Order α, diversity of, 521
Organization, behavioural, a top-down approach to the analysis of, 457
Orientation, klinotactic, computer-simulated, turning field size and its effects on, 151

PARNAS, H. and SEGEL, L. A., Exhaustion of calcium does not terminate evoked neurotransmitter release, 345
Peptidoglycan pseudomurein, bacterial cell wall, structural studies on: conformational energy calculations on the glycan strands in C1 conformation and comparison with murein, 85
Pheromonal attraction, relation between swimming speed and: evolution of gamete motility differences, 57
Phosphorylation, oxidative, mitochondrial, control of, 179
Photosynthesis, canopy, instantaneous and daily, a model of, 531
Phylogeny, maximum savings in the Steiner problem in, 471
Population dynamics of insects with discrete generations, vertical transmission of diseases and: a model, 287
Potassium channel currents in biological membranes, the effects of cesium ions on, 189
Predation by starfish of a growing coral reef community, 667
Promoter regions and secondary structure in the promoter regions, a model for transcriptional regulation based upon homology between introns and: the human globins, 1
Protein degradation, intracellular, basis of a self-regulating mechanism for the proteolysis of endogenous proteins, 127
Protein synthesis in eukaryotes, amino terminal acetylation and, 405
Proteolysis of endogenous protein, basis of a self-regulating mechanism for: intracellular protein degradation, 127
Proton NMR chemical shifts and interaction energy calculations in a theoretical study of the geometrical arrangement of GT and GA wobble pairs in two short duplexes, 211
Proton transfer, single versus double: the catalytic mechanism of serine proteases, 329

Quantum mechanics, role in the theory of muscle contraction (letter), 173

Receptor submergence, cell membrane entropy as regular of, 243
Recombination, construction and use of models to demonstrate topological properties of multistranded nucleic acid structure and its possible bearing on, 37
RÉGNIÈRE, J., Vertical transmission of diseases and population dynamics of insects with discrete generations: a model, 287
Regulation, immune, of somatic cell differentiation, a concept of, 443
Regulation, transcriptional, a model based upon homology between introns and promoter regions and secondary structure in the promoter regions: the human globins, 1
Regulator of receptor submergence, cell membrane entropy as, 243

Reproduction, optimal life histories and age-specific costs of; two extensions (letter), 169
Reptation theory for migration of linear DNA through gels, should it include screwing? (letter), 165
RIDDELL, P. M. (see KITNEY, R. I.), 367
ROSIN, R., Further analysis of the honey bees "dance language" controversy. I. Presumed proofs for the "dance language" hypothesis by Soviet scientists, 417
